---

## CAR EVENTS

---

If you are planning an event in 2025 we can assist you !

Our events department can arrange not only the logistics of shipping vehicle to an event or a filming destination, but also we can arrange routes and hotels and full concierge packages.

Specifically for Italy, Türkiye, Spain, Portugal and the south of France, but also further afield in USA, Brazil and Canada or event destinations in Africa.

---

## USA SHIPPING AND PORT NEWS

---

2025 will see potentially new trade tariffs imposed by the USA, and consequently retaliatory tariffs by those countries affected - we will update as soon as we are aware.

USA port labour negotiations could lead to US Port Strikes as early as January 16th 2025 which could last throughout January. The adoption of Automated technology remains a major challenge with significant implications for employment and the port industry

**USA NEWS :** Port labour negotiations lead to US Port Strikes turmoil and Stirkes set to start as early as January 16th 2025 to last throughout January. However on the 09/01/2025 the he upcoming planned port strike has been successfully averted, thanks to a new agreement reached by the ILA dockworkers union and the ocean carriers.

The adoption of Automated technology remains a major challenge with significant implications for employment and the port industry. Stay tuned!

---

# ELECTRIC VEHICLES

---

From 1 April 2025, registered keepers of electric, zero or low emission cars, vans and motorcycles will need to pay vehicle tax in the same way as registered keepers of petrol and diesel vehicles. This change will apply to both new and existing vehicles.

This new measure removes band A under the existing VED system which is currently £0. Vehicles in this band will be required to move to the first band where a rate becomes payable.

---

## HOW THE CHANGES WILL AFFECT YOUR VEHICLE

---

Electric, zero or low emission cars registered on or after 1 April 2017 and 31st March 2025  
You will need to pay the lowest first year rate of vehicle tax set at £10 from 1 April 2025.  
From the second tax payment onwards, you will pay the standard rate. This will be £195.

Electric, zero or low emission cars registered between 1 March 2001 and 31 March 2017  
These vehicles will move to the first band that has a VED value. This will be £20.

### Hybrid and alternatively fuelled vehicles (AFVs)

The £10 annual discount for hybrid and AFVs will be removed, and the rate you will pay will depend on when the vehicle was first registered.

If the vehicle was: registered before 1 April 2017 - this rate will depend on the vehicle's CO2 emissions (check the current rates for these vehicles). if it was registered on or after 1 April 2017 you will pay the standard rate (this will be £195)

---

## ELECTRIC VANS

---

**Electric vans :** Most electric vans will move to the standard annual rate for light goods vehicles.

**Electric motorcycles** and tricycles will move to the annual rate for the smallest engine size.

**Additional rate (expensive car supplement)**

New electric and zero emission vehicles registered on or after 1 April 2025 with the list price exceeding £40,000 will attract the standard rate, plus the expensive car supplement for the first 5 years from the start of the second licence. (Source -driver and vehicle licensing ).

---
